

# BRENNA

## BRENNA Gauntlet 8081 / BRENNA Wristlet 8082

### Structural firefighting gloves

#### Outer shell

**Back:** Split cowhide leather, black

**Palm:** Grain cowhide leather, black

**Fourchettes** - material between fingers: Grain cowhide leather, beige

The leather is specially treated for a heat, water and abrasion resistance, yet remains very flexible.

#### Inner layers

Thermo-protective layer on the back of the hand and thumb

Aramid non-woven fabric – increased heat, abrasion and cut resistance

#### Moisture barrier

Porelle® P540 polyurethane FR membrane

creates a barrier against water, chemicals, bloodborne pathogens as well as bacteria, is highly breathable, flexible, sensitive and firm.

#### Lining

Aramid lining with increased thickness

increases heat protection,

will not stretch or pull out,

enables easy donning and doffing even when wet,

is brushed on the reverse – allows more air inside the glove and increases heat protection.

#### Additional information

Advanced stitching techniques for improved dexterity and making the lining stay inside by attaching it at fingertips

Anatomical 3D Cut for better grip and perfect fit

Breathability, sensitivity, flexibility

Wrist part of the glove is tightened with elastic

**Available in 2 styles – gauntlet cuff or para-aramid knitted wristlet.**

Certified by SEI to comply with NFPA 1971, 2018 Edition.

NFPA® is a registered mark of the National Fire Protection Association.
